- Teams will be divided in four categories.
- Teams will play with each team in their group.
- Every four ball will be a match against each other, which means every individual member of a team will be playing 3 matches at any point of time.
- The match will be played against the same category players of different teams.
- The stroke differential will be in play for match play and strokes on the assigned hole will have to be given to the higher handicapper.
- 50% handicap difference to decide strokes to be conceded. All fractions to be rounded off to zero (example - Player A has 11 handicap and Player B has handicap 14, Thus $14 - 11 = 3$ and 50% of 3 is 1.5, which gets rounded off to 1. Hence Player B will get 1 stroke from Player A)
